# Medical Officer's Annual Report

## FOR THE YEAR 1904.

---

TO THE  
CHAIRMAN AND MEMBERS  
OF THE  
Long Ashton Rural District Council.

---

LONG ASHTON,

*January, 1905.*

GENTLEMEN,

I beg to place before you my Report on the Sanitary Condition of the District during the year 1904.

The calculations as to Births, Deaths, and Sickness are based upon a population of 15,689 (census 1901).

## Births.

The Births in the year were 398, giving a rate of 25·30 per thousand population. Last year the rate was 22·436.

### A

In the "Long Ashton District," comprising the Parishes of :—

	BOYS.	GIRLS.	TOTAL.
Long Ashton ... ..	83	78	161
Backwell ... ..			
Bishopsworth ... ..			
Barrow Gurney ... ..			
Dundry ... ..			
Flax Bourton... ..			
Winford ... ..			
Workhouse ... ..			
Wraxall ... ..			

### B

"St. George's District," comprising the Parishes of :—

Abbot's Leigh ... ..	51	74	125	} Were registered.
Clapton ... ..				
Easton-in-Gordano ... ..				
Portbury ... ..				
Walton-in-Gordano ... ..				
Weston-in-Gordano ... ..				

### C

"Yatton District," comprising the Parishes of :—

Yatton ... ..	54	58	112
Nailsea ... ..			
Kenn ... ..			
Tickenham ... ..			
Brockley ... ..			
Kingston Seymour ... ..

---

398

The excess of Births over Deaths (natural increase of population) 156.

## Deaths.

The Deaths in the whole District at all ages and from all causes were 242, the rate being 15·424. The rate last year was 12·429.

In the Long Ashton District, including					
Workhouse (26)	...	...	...	105	} Were registered.
St. George's District	...	...	...	68	
Yatton District	...	...	...	69	
				<hr/> 242	

## Infant Mortality.

During the year 398 children were born, of whom 51 died under one year, giving an Infant Death Rate of 128·14.

The rate last year was 56·818.

## Zymotic Diseases.

The Death Rate per 1,000 from Zymotic Diseases is 50.

Whooping Cough	...	...	...	3
Enteric Fever	...	...	...	1
Diarrhœa	..	..	...	4
				<hr/> 8

## Sickness.

Under the Notification of Infectious Diseases Act, 88 cases were reported to me.

14 cases of Diphtheria.

3 cases of Erysipelas.

70 cases of Scarlet Fever.

1 case of Enteric or Typhoid Fever.

---

88

The number reported in 1903 was 37.

### **Scarlet Fever.**

In proportion to the population a large number of Scarlet Fever cases occurred, 70 cases having been notified, as against 21 cases last year. There were no deaths. Of these 40 occurred in the Long Ashton District, 16 in the Yatton District, and 14 in the St. George's District.

The preponderance of cases in the Long Ashton District is due to the outbreak at Bishopsworth, where a main sewer was under repair, and the children played around it both on their way to and from school.

The difficulties in dealing with the epidemic have been the mildness of the attack, the cases apparently recovering in a few days and then mixing with healthy children; also the impossibility of isolating cases in their own homes, their friends being allowed to come in and out of the infected houses.

There can be no doubt that many cases existed which were never seen by a medical man and never notified under the Act, and these are a great source of danger.

The Sanitary Inspector has great difficulty in disinfecting houses where the rooms open one into the other or upon the stairs, and this difficulty is increased by the number of small articles about a house, such as rags, linen, books, &c.

---

### **Enteric Fever.**

There was only one case notified in the Yatton District, and this died.

---

### **Diphtheria.**

Fourteen cases were notified, three in the Long Ashton and eleven in the Yatton District.

There were no deaths.

### **Small Pox.**

None.

---

### **Measles.**

This disease is not included in the notifiable diseases in this District.

---

### **Whooping Cough.**

This disease has been prevalent during the year. Three deaths were registered from it.

---

### **Heart Disease.**

There were 27 deaths from this disease, 2 between 5 and 15, 7 between 25 and 65, and 18 over 65.

---

### **Lung Disease.**

Bronchitis and Pneumonia 22 deaths—9 from Bronchitis, 13 from Pneumonia.

---

### **Influenza.**

There was one death registered from this disease.

---

### **Phthisis.**

Thirteen deaths were registered from this disease. In my previous Reports I have mentioned the causes of the spread of this disease, and the general precautions to be observed in its prevention.

---

### **Diarrhoea.**

There were four deaths registered from this disease, all children under one year.

## **Causes affecting the Health of the District.**

1st—Bad water supply in some of the parishes ; wells, as a rule, shallow and often polluted with soakage from highly manured soil ; wells in proximity to pigsties.

2nd—Inattention to cesspits and drains, where they exist.

3rd—Want of fire-places in bedrooms for warmth in sickness and for ventilation at all times.

4th—Over-crowding.—There are not enough cottages for the working classes in the district.

5th—The difficulty arising in country districts from the scarcity of proper nursing, from ignorance of the use of proper disinfectants, and from a general indisposition on the part of the people to avail themselves of Public Institutions.

6th—The impossibility of isolating the patients and the difficulty of disinfecting and properly carrying out sanitary measures in crowded cottages.

7th—More than all, the reckless way in which parents allow children recovered from infectious disease to return to school or play with healthy children.

---

## **Work Done.**

The advice given and measures taken have been directed towards the abatement and removal of the evils which I have mentioned.

The schools at Bishopsworth and Failand were closed for a time on account of Scarlet Fever.

In infectious cases, isolation and disinfection were carried out as far as the means at our disposal allowed.

This consisted in the burning of sulphur in closed rooms, in cleansing the walls and ceilings, boiling all clothing that admitted of it, and in burning what cannot be treated with sulphur or boiling.

The distribution of disinfectants supplied to the Inspector by the Council.

Samples of water have been analysed and dealt with as the case required.

There is an Isolation Hospital for 12 beds near the Workhouse. It would be well if this could be made available for the Long Ashton District, as it has not been used by the Workhouse authorities for over five years.

### **Industries.**

At Winford there are Mines for raising Iron Ore and Ochre. I can trace no illness arising from the use of the drinking water of that part of the District.

There are Coal Mines at Ashton, also a Steam Laundry.

There is no important industry, other than Agriculture, carried on in the rural villages.

At Pill a large portion of the inhabitants is engaged in a seafaring life.

### **Geology of the Area.**

Yatton, Chelvey, Brockley, Bourton, Long Ashton, Portbury Village, St. George's, Clapton, Winford, Portishead (a lower part), Weston, and Walton, and Wood and Bella Vista, Clevedon—*New Red Sand Stone*.

Barrow Gurney Village, Broadfield Down, Bedminster Down.—*Lias*.

Cadbury, Backwell and Barrow Hill, Charlton Farm, Moat House and Lime Bridge, Walton Down, Highdale, Clevedon, Dial Hill.—*Carboniferous Lime Stone*.

Portbury Marsh and Kingston Seymour.—*Alluvial*.

Failand House and Portishead Down—*Old Red Sand Stone*

Nailsea Coal Measures run from Wraxall Mill round by Jackland's Bridge, thence to the West End of Nailsea, Nailsea Court, South Common, Smoky Hole, and East End.

### **Long Ashton Brook.**

The Council have made a third application to the Local Government Board for a Loan to carry out a scheme of Sewerage to prevent the pollution of the Ashton Brook, and are now awaiting their reply.

---

### **Yatton Water.**

The Local Government Board have held a Local Inquiry as to the proposed Water Supply for the Parish of Yatton, but the Council have not yet heard any result.

---

### **Water Supply.**

There has been no alteration in the Water Supply of the District during the past year. A considerable part of it is supplied by the Bristol, Portishead, and Clevedon Water Companies.

Mr. Edgar Thatcher, of the Nailsea Heath Brewery, still continues to supply part of Nailsea gratuitously with splendid water from a large tank near his house.

The West End of Nailsea has not a good supply of water. An effort might be made to obtain some from the old Coal Pits.

---

I would call the attention of the Rural District Council to the fact that there is at present no provision for dealing with Infectious Cases occurring in the District, the arrangement with Bristol as to taking patients into the Ham Green Hospital and the Novers having now expired.

The Sanitary Inspector's Report is bound up with mine.

I am, Gentlemen,

Yours obediently,

JOSEPH FULLER,

*Medical Officer of Health.*

*To the Chairman and Members of the Long Ashton  
Rural District Council.*

---

GENTLEMEN.

In presenting to you my Annual Report for the past year, there is not much of particular importance to which I need draw your attention. I have been kept busy during the year by various items at different parts of the District, the only portion claiming any special attention being Bishopsworth, where the sewer became choked owing to the very little fall given to it when it was laid.

In connection with this chokage I may say that I attribute the cause of the recent outbreak of Scarlet Fever at Bishopsworth to be owing to the fact that a lot of children would come playing around the open sewer while it was being cleansed ; the workmen could not keep them away.

In reference to the cases of Scarlet Fever just referred to, there have been several cases during the later part of the year at Bishopsworth, and the first cases cropped up soon after the sewer was opened for cleansing purposes. As to the number of cases, I presume that will be reported in the Medical Officer of Health's Report. The epidemic seems now to have run its course.

In the event of infectious disease existing, the usual precautions have been taken, as to isolation, where practical, supplying of disinfectants, fumigation, etc., but some of the earlier cases existed some time before being found out, and the Medical Officer of Health and myself considered as to whether it was advisable to summon one or two people for

not notifying the cases, but, as Dr. Fuller said, they would plead ignorance of the nature of the illness, so we thought a warning sufficient.

There have been several minor nuisances abated during the year, but in no case has legal proceedings been necessary, an intimation to the owner having always sufficed to get it abated.

Upon inquiry, I am told that the new Urinal at Pill is sufficiently used to show that the old one was not sufficient accommodation to meet the present requirements of the public.

The majority of the houses erected during the year have been of a size, &c., to suit the middle classes, thereby leaving the poorer classes in the same condition as last year, living in some instances in small, damp houses.

A row of small houses being erected at Birdwell, Long Ashton, will, no doubt, be appreciated by the working classes of that district, but it is a pity the backlets of these houses are rather small.

There have been two cases of overcrowding in the District that have needed attention ; the people involved have now removed to more suitable dwellings.

The Sewer at the Whitening Yard became choked and had to be cleansed during the early part of the year.

Upon inspection the Dairies are found to be kept clean throughout the District.

I am, Gentlemen,

Your obedient Servant,

D. E. WILLIAMS,

*Inspector of Nuisances.*

YATTON, *January 20th, 1905.*
